Cylinder Jackets and Cutting Plates

M & D Marketing has been manufacturing Cylinder Jackets of the highest quality for more than 35 years. Produced for both Cutting and Creasing and Litho Impression applications these products are manufactured in England for both original and redesigned equipment. They are supplied for both the UK and overseas market.

APPLICATIONS

Die Cutting and Creasing

- Fitted to press cylinders and beds for die cutting and creasing purposes.
- For Cutting, Creasing and Boxmaking machines the Standard and Extra Hard (EH) material thickness is 0.71 mm and the Super Hard (SH) material's thickness is 0.81 mm.

Litho Impression

- Cylinder jackets are fitted to the Litho Impression Cylinder as standard to protect the cylinder on many high-quality sheet-fed offset printing presses.
- Cylinder jackets will absorb minor damage during printing without damaging the cylinder itself. The cylinder jacket is easily and cheaply replaced and ensures perfect printing every time. Specific applications are numbering and perforating when done on this type of press. Many of the jackets are also available in brass and plastic material.
