## Calibrated Under Packing

It is vital for a high quality finish in any of the printing processes that an optimum and even pressure is obtained and to do this high quality precision underpacking or Manilla packing is required.

We offer a large range of Calibrated UnderPacking, which includes VeraPak, Coloured manila packing and the more permanent non-adhesive plastic packing and adhesive plastic packing. All our products are of the highest quality and can be cut to any size required.

Within this product list there are three section each one outlines the standard sizes available in that packing type and the range of thickness.

To avoid irregularities, which can lead to stripes or cloud spots, we recommend the high quality VeraPak for which we act as the European Distribution point from the US.

VeraPak is a Premium quality Press Packing available in the standard range of thicknesses from 0.05 mm to 0.5 mm. Each sheet is clearly stamped with the thickness and most importantly the grain direction for ease of fitment.

VeraPak is **Precision Engineered** to give it a premium quality and given an **Anti-Corrosion Treatment**, which is ideal when fitted for long periods of time to protect the machinery. With an outstanding **Uniform Calliper** and **Excellent Density** it will rival any competing Under Packing.

VeraPak has also been engineered to be **Resistant to Press Wicking** and given an excellent **Anti-Slip treatment**, which gives it a **Highly Dependable Performance**.

We have sample flip packs that we are happy to send out on request, please send us a adding your company name and postal address and any details on potential quantities and we shall send you a sample and quote.

## Coloured Packing

As well as VeraPak we also offer a range of standard coloured packing to distinguish thickness. Like the rest of our packing range this can be cut to size and available in both small piece orders and also in bulk.

The range of colours with their own matching thicknesses (mm) are: snowwhite (0.05), light blue (0.075), grain (0.1), light brown (0.125), brown (0.15), rose (0.175), green (0.2), golden (0.25), lemon (0.3), blue (0.4), grey (0.5)
